Dear Turner,

I am writing to ask for assistance in getting permission for one of the OnePetro materials (presented at the SPWLA 25th Formation Evaluation Symposium of Japan) that does not have the "request for permission" online tool.

The reference is as follows:

Fujii, S., Ishigami, Y., and Kurihara, K. 2019 "Development of Geothermal Reservoir Simulator for Predicting Water-Steam Flow Behavior Considering Non-Equilibrium State and MINC/EDFM Model." Paper presented at the SPWLA 25th Formation Evaluation Symposium of Japan, Chiba, Japan.

Would it be possible to get an email address of the author? I could not find it online.

Thank you and best regards,

Sarah

Hi Sarah,

SPWLA is dedicated to the advancement of the science of petrophysics and formation evaluation by sharing information gathered from authors and their companies.

Permission is granted to publish elsewhere technical material from published SPWLA papers as long as conspicuous acknowledgement is granted to the original presentation of the paper and its authors.

Regards,

Stephanie

Stephanie Turner
