Copyright

Overview

In order for Elsevier to publish and disseminate research articles, we need certain publishing rights from authors, which are determined by a publishing agreement between the author and Elsevier.

For articles published open access, the authors license exclusive rights in their article to Elsevier where a CC BY-NC-ND end user license is selected, and license non-exclusive rights where a CC BY end user license is selected.

For articles published under the subscription model, the authors transfer copyright to Elsevier.

Regardless of whether they choose to publish open access or subscription with Elsevier, authors have many of the same rights under our publishing agreement, which support their need to share, disseminate and maximize the impact of their research.

For open access articles, authors will also have additional rights, depending on the Creative Commons end user license that they select. This Creative Commons license sets out the rights that readers (as well as the authors) have to re-use and share the article: please see here (<https://www.elsevier.com/about/policies/open-access-licenses>) for more information on how articles can be re-used and shared under these licenses.

This page aims to summarise authors' rights when publishing with Elsevier; these are explained in more detail in the [↓ publishing agreement between the author and Elsevier](#).

Irrespective of how an article is published, Elsevier is committed to protect and defend authors' works and their reputation. We take allegations of infringement, plagiarism, ethical disputes, and fraud very seriously.

Search by keyword, title, subject area

The below table explains the rights that authors have when they publish with Elsevier, for authors who choose to publish either open access or subscription. These apply to the corresponding author and all

co-authors.

Author rights in Elsevier's proprietary journals	Published open access	Published subscription
Retain patent and trademark rights	√	√
Retain the rights to use their research data freely without any restriction	√	√
Receive proper attribution and credit for their published work	√	√
Re-use their own material in new works without permission or payment (with full acknowledgement of the original article): <ol style="list-style-type: none"> 1. Extend an article to book length 2. Include an article in a subsequent compilation of their own work 3. Re-use portions, excerpts, and their own figures or tables in other works. 	√	√
Use and share their works for scholarly purposes (with full acknowledgement of the original article): <ol style="list-style-type: none"> 1. In their own classroom teaching. Electronic and physical distribution of copies is permitted 2. If an author is speaking at a conference, they can present the article and distribute copies to the attendees 3. Distribute the article, including by email, to their students and to research colleagues who they know for their personal use 4. Share and publicize the article via Share Links, which offers 50 days' free access for anyone, without signup or registration 5. Include in a thesis or dissertation (provided this is not published commercially) 6. Share copies of their article privately as part of an invitation-only work group on commercial sites with which the publisher has a hosting agreement 	√	√
Publicly share the preprint on any website or repository at any time.	√	√

Search by keyword, title, subject area

Author rights in Elsevier's proprietary journals (https://www.elsevier.com/author-rights) Q (https://www.elsevier.com/search-results)	Published open access	Published subscription
Publicly share the accepted manuscript on non-commercial sites	√	√ using a CC BY-NC-ND license and usually only after an embargo period (see Sharing Policy (https://www.elsevier.com/about/policies/sharing) for more information)
Publicly share the final published article	√ in line with the author's choice of end user license	×
Retain copyright	√	×

Institution rights

Regardless of how the author chooses to publish with Elsevier, their institution has the right to use articles for classroom teaching and internal training. Articles can be used for these purposes throughout the author's institution, not just by the author:

Institution rights in Elsevier's proprietary journals (providing full acknowledgement of the original article is given)	All articles
Copies can be distributed electronically as well as in physical form for classroom teaching and internal training purposes	√
Material can be included in coursework and courseware programs for use within the institution (but not in Massive Open Online Courses)	√
Articles can be included in applications for grant funding	√
<p>Overview and dissemination of institutional rights. Governmental rights. Find out more</p> <p>Search by keyword, title, subject area</p> <p>formal submission can be posted publicly by the awarding institution with DOI links back to the formal publication on ScienceDirect</p>	√

For US government employees, works created within the scope of their employment are considered to be public domain and Elsevier's publishing agreements do not require a transfer or license of rights for such works.

In the UK and certain commonwealth countries, a work created by a government employee is copyrightable, but the government may own the copyright (Crown copyright). Click here (<https://www.elsevier.com/open-access/agreements/uk-national-archives>) for information about UK government employees publishing open access.

Thesis / Dissertation Reuse

The IEEE does not require individuals working on a thesis to obtain a formal reuse license, however, you may print out this statement to be used as a permission grant:

Requirements to be followed when using any portion (e.g., figure, graph, table, or textual material) of an IEEE copyrighted paper in a thesis:

- 1) In the case of textual material (e.g., using short quotes or referring to the work within these papers) users must give full credit to the original source (author, paper, publication) followed by the IEEE copyright line © 2011 IEEE.
- 2) In the case of illustrations or tabular material, we require that the copyright line © [Year of original publication] IEEE appear prominently with each reprinted figure and/or table.
- 3) If a substantial portion of the original paper is to be used, and if you are not the senior author, also obtain the senior author's approval.

Requirements to be followed when using an entire IEEE copyrighted paper in a thesis:

- 1) The following IEEE copyright/ credit notice should be placed prominently in the references: © [year of original publication] IEEE. Reprinted, with permission, from [author names, paper title, IEEE publication title, and month/year of publication]
- 2) Only the accepted version of an IEEE copyrighted paper can be used when posting the paper or your thesis on-line.

3) In placing the thesis on the author's university website, please display the following message in a prominent place on the website: In reference to IEEE copyrighted material which is used with permission in this thesis, the IEEE does not endorse any of [university/educational entity's name goes here]'s products or services. Internal or personal use of this material is permitted. If interested in reprinting/republishing IEEE copyrighted material for advertising or promotional purposes or for creating new collective works for resale or redistribution, please go to http://www.ieee.org/publications_standards/publications/rights/rights_link.html to learn how to obtain a License from RightsLink.

If applicable, University Microfilms and/or ProQuest Library, or the Archives of Canada may supply single copies of the dissertation.
