I approve the use of the figure from your paper, "Synthesis, structure, and optoelectronic properties of II–IV–V₂ materials", in your dissertation.

Hi Adele,

As the PI for the work published in "Synthesis, structure, and optoelectronic properties of II–IV–V₂ materials" a *Journal of Materials Chemistry A* review article, do I have your permission to replicate Figure 1(b) in my dissertation? I have obtained permission from the journal and will cite it appropriately.

If I have your permission, could you please respond to this email stating that you approve the use of the figure from your paper, "Synthesis, structure, and optoelectronic properties of II–IV–V₂ materials", in my dissertation?

Thank you,
Rekha
