STATE BUREAU OF MINES

STATE OF COLORADO

MT. ROSA MINING, MILLING AND LAND COMPANY.

President, O. C. Townsend; Vice President Clarence Edsall; Secretary Alfred E. Rope; Treasurer S. B. Dickens. Office of the Company Room 25 Hageman Building, Colorado Springs, Colo. Location of mines Cripple Creek Mining District, Townsite of Victor, Colorado. Character of mineral, gold bearing. Date and place of incorporation January 9th, 1892, Colorado Springs, Colorado; capitalization 1,000,000 shares, par value one dollar. There is not any treasury stock remaining.

Full list of claims and property owned by the company is as follows:

Adams Lode,	4.783 acres.	
Gold Coin Lode,	2.227	(All property of the Mt. Rosa Co. is patented.)
Mt. Rosa Lode,	4.263	
Rosa Lee Lode,	10.331	
Mt. Rosa acreage,	96.443,	with underground lode rights.

The property is being developed by lessees, six sets of leases being in operation. On the Adams the main shaft has been sunk to a depth of 270 feet. On the Mt. Rosa the shaft has been sunk 190 feet and three drifts have been run, one 265 feet, one 60 feet and one 40 feet. On Block 15 of the company's property there is a shaft 312 feet deep, but no work is being done on this part of its ground at the present time. The Mt. Rosa and Battle Mountain Tunnel Gold Mining Company which has a lease of over four years yet to run is driving a tunnel under the town site of Victor through the ground of the Mt. Rosa company. It has so far penetrated this ground about 400 feet.

Although fair assays have been obtained from the Mt. Rosa and Adams claims, no shipments have been made. The only shipping mine which has so far been discovered on the property of the Mt. Rosa Company is the Gold Coin. The company sold 6.617 acres of the Gold Coin claim for \$55,000, which was the amount of the bond. The Gold Coin mine is now one of the largest producers in the camp, shipping about 300 tons a week. There seems good reason to believe that, as the Gold Coin vein runs north and south and the Mt. Rosa company own about 2- $\frac{1}{2}$  acres of the south end of the claim, with further development a rich ore shaft may be opened up in the Mt. Rosa ground the same as that encountered in the Gold Coin. The vein has been opened up, but it is not expected that any high values will be obtained until further depth is reached.

Alfred E. Rope,

Secretary.
