

## CONTENTS

Foreword . . . . .	v
Oil Shale Retorting Processes: A Technical Overview A.E. Lewis, R.L. Braun, and J.C. Diaz . . . . .	1
Cold Flow Model Testing of the Hytort Process Retort Design R.C. Rex, Jr., J.C. Janka, and T.M. Knowlton . . . . .	17
In Situ Retorting Via RF Heating--A Conceptual Design G.D. Gould, R.R. McKinsey, J.E. Bridges, and G. Sresty . . . . .	37
Indirect In Situ Retorting of Oil Shale Using the TREE <sup>SM</sup> Process J.R. Coveil, J.L. Fahy, J. Schreiber, B.C. Sudduth, and L. Trudell . . . . .	46
An Experimental Study of Flow Mechanisms in In Situ Oil Shale Retorting K.K. Lau . . . . .	59
Oil Field Losses in Non-Uniform In Situ Oil Shale Retorts C.E. Tyner . . . . .	69
What's Next for Shale Development? R.M. Lieber . . . . .	87
Kinetic Studies on Kerogen Decomposition M. Natarajan . . . . .	93
Effects of High Temperature and Heating Rate on Kerogen Decomposition C.S. Wen, D.A. Danner, T.P. Kobylnski, and A.B. King . . . . .	103
High Temperature Minerals in an In Situ Oil Shale Retort G.M. Mason, L.K. Spackman, and J.D. Williams . . . . .	121
Gulf Shale Oil Upgrading Process Technology W. Jones, II, D. Lyzinski, J.B. Miller, A.V. Cugini, and F.J. Antezana . . . . .	133
Sedimentological, Mineralogical and Geochemical Definition of Oil Shale Facies in the Lower Parachute Creek Member of Green River Formation, Colorado R.D. Cole . . . . .	143
Variations in Organic Geochemistry and Petrography with Depth of Burial, Green River Formation Oil Shales, Piceance Creek Basin, Colorado W.S. Meddaugh, S. Imbus, F.T.C. Ting, and C.A. Salotti . . . . .	159
Variation of Fischer Assay Pyrolysis Products with Depth, Green River Formation Oil Shales, Piceance Creek Basin, Colorado W.S. Meddaugh . . . . .	171
Oil Shale Retorting--Measuring Process Yields M.T. Atwood and S.W. Tyson . . . . .	187
The Role of Computer Simulation in Oil Shale Blasting T.F. Adams and C.F. Keller . . . . .	198
Development of a Predictive Capability for Oil Shale Rubblization: Result of Recent Cratering Experiments R.L. Parrish and J.S. Kuszmaul . . . . .	205
Applying the Colorado Joint Review Process To Oil Shale Development Projects Adam Poe . . . . .	221
Summary of the Oil Shale Fragmentation Program at Anvil Points Mine, Colorado R.D. Dick, Chapman Young, and W.L. Fourney . . . . .	225
Explosion Hazards of Oil Shale Dusts: Limits, Pressures, and Ignitability K.L. Cashdollar, Martin Hertzberg, and R.S. Conti . . . . .	243
Dust Explosion Hazards Due To Blasting of Oil Shale J.K. Richmond and F.P. Beitel . . . . .	255

A Brief Comparison of Some Technological and Environmental Aspects of Large-Scale Surface and Underground Mining of Oil Shale, Piceance Creek Basin, Colorado G.A. Miller, J.R. Dyni, and D.R. Dietz . . . . .	269
A Benefit/Cost Analysis of Availability in Oil Shale Material Handling Systems F.W. Tagge and J.B. Reisdorf . . . . .	279
Isothermal Fluidised-Bed Pyrolysis of Australian Oil Shales in Superheated Steam G.C. Wall . . . . .	300
An Engineering Approach To the Elimination of Contaminated Seepage from Processed Shale Piles Adrian Brown, G.H. Watson, and D.B. McWhorter . . . . .	310
Evaluation of Rundle Spent Shale as an Adsorbent for the Treatment of Retort Water P.R.F. Bell, P.F. Greenfield, M. Corney, and A.J. Moore . . . . .	318
Solid/Retort Water Interactions: The Fate of Organics and Inorganics E.J. Peterson, M.M. Jones, J. Lynn, and W.D. Spall . . . . .	329
The Mobility of Organic Compounds in a Codisposal System J.P. Fox, P. Persoff, A. Newton, and R.N. Heistand . . . . .	339
Applications of Liquid Chromatography with Electrochemical Detection To the Analysis of Oil Shale Process Waters and Leachates G.E. Batley . . . . .	352
Current Environmental Issues Facing Oil Shale Development J.G. Welles . . . . .	359
Rapid Estimation of Organic Nitrogen in Oil Shale Wastewaters B.M. Jones, G.J. Harris, and C.G. Daughton . . . . .	367
Inorganic Sulfur Species in Retorted Oil Shale J. Howatson, J.A. Clark, and R.E. Poulson . . . . .	376
Oil Shale Health and Environmental Effects Research Projects and Risk Analysis Requirements Paul Cho . . . . .	384
Public Health Risks from an Oil Shale Industry B.W. Perry and L.B. Gratt . . . . .	391
High Risk Groups in an Oil Shale Workforce L.B. Gratt, B.W. Perry, W.M. Marine, and D.A. Savitz . . . . .	403
Risk of Dust-Induced Lung Disease in Oil Shale Workers W.D. Marine, D.A. Savitz, L.B. Gratt, and B.W. Perry . . . . .	414
Hydrocarbon-Induced Cancer Risks in Oil Shale Processing D.A. Savitz, W.M. Marine, L.B. Gratt, and B.W. Perry . . . . .	426
Use of Critical Surface Tension of Wetting in the Beneficiation of Oil Shales: "Gamma Flotation" B. Yazar and G.P. Hemphill . . . . .	433
