

Nov. 14, 1934.

Mr. Arthur Roeder,
Continental Oil Bldg.,
Denver, Colo.

Dear Mr. Roeder:

I have details of two mining proposals which may interest you.

(1) The extension of the famous Lamartine Mine (Clear Creek Co.) The Lamartine produced about \$5,000,000.00, one half being profit.

There are 52 claims in this group. Ore has been opened in six places. So far as I can judge from reading reports, there is every reason to expect a continuation of the Lamartine enrichment.

The outcrop is high, flat and wet, so a cross-cut tunnel was started in a favorable location. It is said that 200 feet more driving in this cross-cut will intersect the vein 350 feet deep.

Tyson Dines' estate owns one-fifth, Harold Hopper owns one-fifth. He is the active member of the group. Hopper wants working capital.

(2) O. R. Bowers of Gunnison County is a ranchman and miner of exceptionally good reputation. He says he has found a vein in the San Juan range that is very wide and will average \$6.75 per ton for long distances. He wants working capital.

If either of these proposals interests you, let me know.

Sincerely,

GJB:j
