Order Details

1. Journal of the Electrochemical Society

Billing Status:
Open

Order License ID	1142060-1	Type of use	Republish in a thesis/dissertation
Order detail status	Completed	Publisher	IOP Publishing
ISSN	1945-7111	Portion	Chapter/article
			0.00 USD
			Republication Permission

LICENSED CONTENT

Publication Title	Journal of the Electrochemical Society	Country	United States of America
Author/Editor	Electrochemical Society.	Rightsholder	IOP Publishing, Ltd
Date	12/31/1947	Publication Type	e-Journal
Language	English	URL	http://www.scitation.org/JES

REQUEST DETAILS

Portion Type	Chapter/article	Rights Requested	Main product
Page range(s)	110554	Distribution	Worldwide
Total number of pages	13	Translation	Original language of publication
Format (select all that apply)	Print,Electronic	Copies for the disabled?	No
Who will republish the content?	Author of requested content	Minor editing privileges?	No

Duration of Use	Life of current and all future editions	Incidental promotional use?	No
Lifetime Unit Quantity	Up to 499	Currency	USD

NEW WORK DETAILS

Title	Modeling and simulation of chemo-mechanical behavior in electrochemical cells	Institution name	Colorado School of Mines
Instructor name	Kasra Taghikhani	Expected presentation date	2021-08-18

ADDITIONAL DETAILS

The requesting person / organization to appear on the license	Kasra Taghikhani
--	------------------

REUSE CONTENT DETAILS

Title, description or numeric reference of the portion(s)	Chemo-Mechanical Behavior of Highly Anisotropic and Isotropic Polycrystalline Graphite Particles During Lithium Intercalation	Title of the article/chapter the portion is from	Chemo-Mechanical Behavior of Highly Anisotropic and Isotropic Polycrystalline Graphite Particles During Lithium Intercalation
Editor of portion(s)	IOP Publishing Limited	Author of portion(s)	Electrochemical Society.
Volume of serial or monograph	167	Publication date of portion	2020-07-24
Page or page range of portion	110554		

IOP Publishing, Ltd Terms and Conditions

These special terms and conditions are in addition to the standard terms and conditions for CCC's Republication Service and, together with those standard terms and conditions, govern the use of the Works. As the User you will make all reasonable efforts to contact the author(s) of the article which the Work is to be reused from, to seek consent for your intended use. Contacting one author who is acting expressly as authorised agent for their co-author(s) is acceptable. User will reproduce the following wording prominently alongside the Work: the source of the Work, including author, article title, title of journal, volume number, issue number (if relevant), page range (or first page if this is the only information available) and date of first publication; and a link back to the article (via DOI); and if practicable, and IN ALL CASES for new works published under any of the Creative Commons licences, the words "© The Electrochemical Society. Reproduced by permission of IOP Publishing Ltd. All rights reserved" Without the express permission of the author(s) and the Rightsholder of the article from which the Work is to be reused, User shall not use it in any way which, in the opinion of IOP Publishing Ltd, could: (i) distort or alter the author(s)' original intention(s) and meaning; (ii) be prejudicial to the honour or reputation of the author(s); and/or (iii) imply endorsement by the author(s) and/or the Rightsholder and/or IOP Publishing Ltd. This licence does not apply to any article which is credited to another source and which does not have the copyright line '© The Electrochemical Society'. User must check the copyright line of the article from which the Work is to be reused to check that the Electrochemical Society and IOP Publishing Ltd has all the necessary rights to be able to grant permission. User is solely responsible for identifying and obtaining separate licences and permissions from the copyright owner for reuse of any such third party material/figures which the Rightsholder is not the copyright owner of. The Rightsholder shall not reimburse any fees which User pays for a republication license for such third party content. This licence does not apply to any material/figure which is credited to another source in the Rightsholder's publication or has been obtained from a third party. User must check the Version of Record of the article from which the Work is to be reused, to check whether any of the material in the Work is third party material. Third party citations and/or copyright notices and/or permissions statements may not be included in any other version of the article from which the Work is to be reused and so cannot be relied upon by the User. User is solely responsible for identifying and obtaining separate licences and permissions from the copyright owner for reuse of any such third party material/figures where the Rightsholder is not the copyright owner. The Rightsholder shall not reimburse any fees which User pays for a republication license for such third party content. User and CCC acknowledge that IOP Publishing Ltd and/or the Rightsholder may, from time to time, make changes or additions to these special terms and conditions without express notification, provided that these shall not apply to permissions already secured and paid for by User prior to such change or addition. User acknowledges that the Rightsholder and IOP Publishing Ltd (which includes companies within its group and third parties for whom it publishes its titles) may make use of personal data collected through the service in the course of their business. If User is the author of the Work, User may automatically have the right to reuse it under the rights granted back when User transferred the copyright in the article to the Rightsholder. User should check the copyright form and the relevant author rights policy to check whether permission is required. If User is the author of the Work and does require permission for proposed reuse of the Work, User should select 'Author of requested content' as the Requestor Type. The Rightsholder shall not reimburse any fees which User pays for a republication license. If User is the author of the article which User wishes to reuse in User's thesis or dissertation, the republication licence covers the right to include the Version of Record of the article, provided it is not then published commercially. User must include citation details and, for online use, a link to the Version of Record of the article on the IOPscience website. User may need to obtain separate permission for any third party content included within the article. User must check this with the copyright owner of such third party content. User may not include the article in a thesis or dissertation which is published by ProQuest. Any other commercial use of User's thesis or dissertation containing the article would also need to be expressly notified in writing to the Rightsholder at the time of request and would require separate written permission from the Rightsholder. As well as CCC, the Rightsholder and IOP Publishing Ltd shall have the right to bring any legal action that they deem necessary to enforce their rights should they consider that the Work infringes those rights in any way. For content reuse requests that qualify for permission under the STM Permissions Guidelines, which may be updated from time to time, the STM Permissions Guidelines supplement the terms and conditions contained in this license.

IOP Publishing, Ltd Special Terms and Conditions

When you transferred the copyright in your article to The Electrochemical Society you were granted back certain rights, including the right to include the Final Published Version of the article within any thesis or dissertation. Please note you may need to obtain separate permission for any third party content you included within your article. Please include citation details, "© The Electrochemical Society. Reproduced with permission. All rights reserved" and for online use, a link to the Version of Record. The only restriction is that if, at a later date, you wanted your thesis/dissertation to be published commercially, further permission would be required.
