

CONTENTS

	Page
Foreword.....	vii
Some Geological Considerations for the Economic Evaluation of Canadian Oil Shale Deposits G. Macauley, T.G. Powell, and L.R. Snowdon.....	1
The Devonian-Mississippian Oil Shale Resource of the Eastern United States R.D. Matthews.....	14
Fracture History of the Northern Piceance Creek Basin, Northwestern Colorado E.R. Verbeek and M.A. Grout.....	26
Using a Multiple Log Approach to Evaluate Green River Oil Shale in the Piceance Creek Basin Rob Habiger and R.H. Robinson.....	45
Field Studies of Joints: Insufficiencies and Solutions, with Examples from the Piceance Creek Basin, Colorado M.A. Grout and E.R. Verbeek.....	68
A Standard Technique for Handling, Marking, and Logging Oil Shale Core J.A. Hartley and T.N. Beard.....	81
Microcrystalline Nahcolite on the 1840 Level, Horse Draw Mine, Piceance Creek Basin, Colorado R.D. Cole and G.J. Daub.....	99
Mineralogy and Geochemistry of Green River Formation Oil Shales, C-A Tract, Colorado W.S. Meddaugh and C.A. Salotti.....	113
Mineralogy of the Mahogany Marker Tuff of the Green River Formation, Piceance Creek Basin, Colorado G.M. Mason.....	124
Chemical Aspects of Eastern Oil Shale Retorting: Analysis of a Core A.M. Rubel, D.W. Koppelaar, D.N. Taulbee, and T.L. Robl.....	132
Distribution and Origin of Sulfur in Colorado Oil Shale J.R. Dyni.....	144
Variations in Sulfur Mineralization in the Parachute Creek Member of Green River Formation, Colorado and Utah D.L. Boyer and R.D. Cole.....	160
Stratigraphic Variation of Sulfur Isotopes in Colorado Corehole Number 1 J.W. Smith and N.B. Young.....	176
Laboratory Study of the Effects of Combustion Gases on Retorting of Green River Oil Shale with Superheated Steam A.L. Tyler, H.R. Jacobs, and E.A. Bullen.....	189
Median Residence and Dispersion Times for Fluidization of Crushed Oil Shale D.E. Christiansen and R.G. Mallon.....	199
Attrition of Spent Oil Shales During Pneumatic Conveying and Cyclone Separating J.F. Carley.....	207
Material Balance Technique for Analysis of In Situ Oil Shale Retorting B.H. Major and P.J. Hommert.....	228

	Page
Heat Generation During Wet Oxidation of Oil Shale Wastewaters by the Vertical Tube Reactor Process J.E. Barnes and C.B. Cassetti.....	242
Results of the Processing of a Western Oil Shale on the Allis-Chalmers Roller Grate Retort System B.P. Faulkner, M.H. Weinecke, R.F. Cnare.....	255
Results from the Simultaneous Processing of Modified In Situ Retorts 7 & 8 A.L. Stevens and R.L. Zahradnik.....	267
Analysis of Occidental Vertical Modified In Situ Retorts 7 and 8 T.C. Bickel.....	281
Improving Flow Uniformity in Vertical Modified In Situ Oil Shale Retorts T.E. Ricketts.....	296
Application of the High Temperature Gas Cooled Reactor to Oil Shale Recovery D.C. Wadekamper, J.R. Impellezzeri, N.T. Arcilla and I.N. Taylor.....	315
High-Temperature Gas-Cooled Reactor (HTGR) Application for Shale Oil Recovery R.N. Quade and R. Rao.....	325
Sandia/Geokinetics Retort 23: Comparison of Real-Time Analyses with Post-Burn Coring Results C.E. Tyner, D.W. Cook, and E.G. Costomiris.....	335
Study of Moroccan Oil Shale Thermal Decomposition Kinetics Omar Bekri, Hachem Baba-Habib, Chang Yul Cha, and M.C. Edelman.....	345
Economics Derived from Detailed and Definitive Design of Superior's Circular Grate Retort for an 18,000 BPD Oil Shale Demonstration Plant D.F. Lilley and J.W. Fishback.....	365
Retorting Kentucky Oil Shales. Yield Optimization at Moderate and Rapid Heating Rates Thomas Coburn, Marshall Margolis, and Ronald Gariepy.....	373
Hydroprocessing of Stuart (Australian) Oil Shale R.M. Baldwin, W.L. Frank, G.L. Baughman, and C.S. Minden.....	388
Size Reduction of Green River Shale C.A. Salotti and R.S. Datta.....	394
Coarse Beneficiation of Green River Oil Shale R.S. Datta and C.A. Salotti.....	413
Beneficiation of U.S. Oil Shales by Froth Flotation G.N. Krishnan, E.P. Farley, and R.G. Murray.....	426
An Engineering Model for Prediction of In Situ Oil Shale Retort Blasting J.T. Schamaun.....	437
Vertical Pneumatic Conveying of Mixed-Particle-Sized Oil Shale Roland Quong.....	451
Fluidized Bed Combustion of Oil Shale H.E. McCarthy.....	469
Chemical and Physical Characterization of Effluent Streams from the Processing of Australian Oil Shale P.R. Bell, P.F. Greenfield, and D.J. Nicklin.....	477
The Utilization of Residual Heat in Spent MIS Retorts for Wastewater Treatment and Process Improvements N.E. Hester and Carl Jacobson.....	487

	Page
Biotreatment of Oil Shale Wastewaters J.B. Healy, Jr., B.M. Jones, G.W. Langlois, and C.G. Daughton.....	498
The Treatability of Wastewaters Produced During Oil Shale Retorting D.R. Day and B.O. Desai, and W.W. Liberick, Jr. ....	512
Evaluation of Control Technology for Modified In Situ Oil Shale Retorts P. Persoff and J.P. Fox.....	534
Oil Shale Health and Environmental Risk Analysis L.B. Gratt.....	541
Effects of MIS Retorting on Groundwater N.E. Hester.....	550
Past and Present Geomorphic Activity in the Piceance Creek Drainage Basin, Northwestern Colorado J.W. Whitney and E.D. Andrews.....	566
Preliminary Computer Model of Ground Water Flow and Solute Transport for MIS Retorting at Tract C-b, Piceance Basin, Colorado R.G. Shepherd.....	578
Environmental Baseline Characterization of the Naval Oil Shale Reserves in Colorado John Dadiani and L.L. Meyer.....	591
Computer Modeling of Interaction of TOSCO II Leachate with Weathered Uinta Formation Esmail Esmaili, D.L. Axtell, and D.D. Runnells.....	602
