License Number	5776260319035
License date	Apr 25, 2024
Licensed Content Publisher	John Wiley and Sons
Licensed Content Publication	Journal of the American Ceramic Society
Licensed Content Title	Transformation Toughening in Zirconia-Containing Ceramics
Licensed Content Author	Richard H. J. Hannink, Patrick M. Kelly, Barry C. Muddle
Licensed Content Date	Dec 21, 2004
Licensed Content Volume	83
Licensed Content Issue	3
Licensed Content Pages	27

Type of use	Dissertation/Thesis
Requestor type	University/Academic
Format	Print and electronic
Portion	Figure/table
Number of figures/tables	1
Will you be translating?	No
Title of new work	UNDERSTANDING DEFORMATION AND CYCLIC BEHAVIOR OF SHAPE MEMORY CERAMICS: A QUANTITATIVE PHASE-FIELD STUDY
Institution name	Colorado School of Mines
Expected presentation date	Apr 2024
Portions	I use figure number 5.
Requestor Location	Colorado School of Mines 305 Zang street APT G30310 DENVER, CO 80228 United States Attn: Colorado School of Mines
Publisher Tax ID	EU826007151
Total	0.00 USD

To: Amirreza Lotfolahpour (Student) <lotfolahpour@mines.edu>

**CAUTION:** This email originated from outside of the Colorado School of Mines organization. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Hi Amirreza, didn't I reply anyway? Or did I dream with it? You can of course use the figures, just make sure to write "Taken from Ref. [X]" to avoid having any issues with the publisher

**Subject:** Fw: Request to use a figure of your online document in my Ph.D. thesis

Hello Dr. Paneda,

I accidentally emailed my request to your previous email. Please see my request in this email.

Best regards,

Amirreza Lotfolahpour

Ph.D. Candidate | Department of Mechanical Engineering

Colorado School of Mines

Mail - Amirreza Lotfolahpour (Student) - Outlook

I am emailing you to ask for permission to use a figure of your previous work in my Ph.D. thesis.

Information of the figure:

Figure 1 (Schematic representation of a domain with a geometric discontinuity: (a) discrete representation, (b) di use representation based on the phase field approach, and (c) two-dimensional approximation of the phase field parameter ) in the documentation provided for:

PHASE FIELD FRACTURE IMPLEMENTATION IN FENICS  
FEniCS Python script with a staggered implementation of the phase field fracture method, suitable for 2D and 3D case studies. Includes a document with detailed instructions.

Paper: Hirshikesh, S. Natarajan, R. K. Annabattula, E. Martínez-Pañeda. Phase field modelling of crack propagation in functionally graded materials. Composites Part B: Engineering 169: 239-248 (2019).

Best regards,

Amirreza Lotfolahpour

**To:** Will Huber (Student) <[whuber@mines.edu](mailto:whuber@mines.edu)>

**Subject:** Permission to use a paper

Hello Dr. Huber,

Do I have your permission to use an article we published together in my PhD thesis. The information of the paper is listed below:

Title: A phase-field model for interactive evolution of phase transformation and cracking in superelastic shape memory ceramics

Authors: Amirreza Lotfolahpour, William Huber, Mohsen Asle Zaeem.

Journal: Computational Materials Science, 216, 2023, 111844

Best,

Amirreza Lotfolahpour
