Dear Andrew,

Use the latest draft for your thesis, no problem, but don't use the formatting of the manuscript by Strain / Wiley as that part contains the copyright,

Greetings, Johan

14-Apr-2024

STRAIN-1933.R1 - Image-based Inertial Impact Test for Viscoelastic Constitutive Identification: A Digital Replica for Error Quantification

Dear Prof. Hoefnagels:

I would like to include the recently accepted article STRAIN-1933.R1 - Image-based Inertial Impact Test for Viscoelastic Constitutive Identification: A Digital Replica for Error Quantification as a chapter in my PhD thesis at Colorado School of Mines. Would "Strain" be able to grant permission to include the article.

This thesis would be distributed publicly via Proquest, and I would be able to embargo that publication for up to a year to ensure that "Strain" retains the first publication of the included works. At present, the copy of the thesis includes a pre-decisional draft of the article and I could either continue using that or use the draft that was recently accepted for publication. If permission to include the article in my thesis is granted, which version would be preferable for the journal? If you are not the correct person to ask, could you please refer me to the proper contact?

I look forward to your answer and seeing this article through to publication in strain. Thanks for your time

Sincerely,  
Mr. Andrew Matejunas  
Strain
