## CONTENTS

	Page
ABSTRACT . . . . .	2
INTRODUCTION . . . . .	4
Statement of Problem . . . . .	4
Location and Access . . . . .	5
Geologic Mapping Previously Undertaken . . . . .	5
Field and Laboratory Studies . . . . .	8
Acknowledgments . . . . .	8
GEOGRAPHY . . . . .	9
Physiographic Character of the San Juan Mountains . . . . .	9
Topographic Character of the Pride of the West Area . . . . .	11
Drainage of the San Juan Mountains . . . . .	11
Climate of the San Juan Mountains . . . . .	12
Flora of the San Juan Mountains . . . . .	13
Human Activities in the San Juan Mountains . . . . .	13
Population . . . . .	14
Industries . . . . .	14
Transportation . . . . .	14
GEOMORPHOLOGY . . . . .	16

CONTENTS (Continued)

	Page
GEOLOGY . . . . .	20
Regional Geologic History . . . . .	20
Pre-Cambrian . . . . .	20
Early Paleozoic . . . . .	21
Late Paleozoic . . . . .	22
Mesozoic . . . . .	22
Cenozoic . . . . .	22
Tertiary . . . . .	23
Stratigraphy . . . . .	26
Petrography and Petrology . . . . .	26
Pro-Cambrian Schists . . . . .	28
Curay Limestone . . . . .	30
Latite Flow Member of the Lower Eureka Rhyolite . . . . .	43
Volcanic Conglomerate Member of the Middle Eureka Rhyolite . . . . .	44
Granite Boulders . . . . .	44
Bedded Tuff Member of the Middle Eureka Rhyolite . . . . .	48
Flow Breccia Member of the Upper Eureka Rhyolite . . . . .	52
Andesite Flow Member of the Upper Eureka Rhyolite . . . . .	57
Rhyolite Flow Member of the Upper Eureka Rhyolite . . . . .	59
Tuff Breccia Member of the Burns Latite . . . . .	62
Latite Flow Member of the Burns Latite . . . . .	62
Tertiary Felsite Dikes . . . . .	65
Structure . . . . .	67
The San Juan Mountains and Adjacent Areas . . . . .	68

CONTENTS (Continued)

	Page
The Silverton Volcanic Center and Its Relation to the Structure of the Pride of the West Area . . . . .	71
Economic Geology . . . . .	76
San Juan Region . . . . .	76
Silverton Volcanic Center . . . . .	77
South Silverton Area . . . . .	79
Pride of the West Area with Special Reference to the Pride of the West Vein System . . . . .	81
History . . . . .	81
Production . . . . .	82
Pride of the West Mine . . . . .	82
Green Mountain Mine . . . . .	83
Little Fanny Mine . . . . .	83
Osceola Mine . . . . .	84
General Description of the Pride of the West Vein System . . . . .	84
Size, Grade and Distribution of Ore Bodies . . . . .	89
Mineralogy . . . . .	89
Carbonate Minerals . . . . .	89
Quartz . . . . .	90
Specular Hematite . . . . .	95
Pyrite . . . . .	95
Sphalerite . . . . .	95
Galena . . . . .	99
Native Silver . . . . .	111
Other Sulphides . . . . .	111

	Page
Other Gangue Minerals . . . . .	111
Paragenesis . . . . .	111
Vein Structures . . . . .	113
Zebra Ore of the Osceola Mine . . . . .	122
Alteration . . . . .	126
Hydrothermal Alteration . . . . .	126
Supergene Alteration . . . . .	127
Ore Controls . . . . .	127
Faulting and Fissuring . . . . .	127
Jointing . . . . .	128
Effect of the Country Rock . . . . .	129
Other Ore Controls . . . . .	131
Interpretation of Magnetometer Data . . . . .	133
Summary and Conclusions . . . . .	134
BIBLIOGRAPHY . . . . .	136

ILLUSTRATIONS  
(Thesis Supplement)

- Plates A, B, C,  
D, E, F      Geologic and topographic maps of the Pride Area  
(50 scale)
- Plate G      Geologic and index map of the Pride Area (200 scale)
- Plate H      Isometric view of parallel E-W cross sections of the  
Pride of the West and Osceola Mines (100 scale)
- Composite longitudinal section of the Pride of the  
West Mine (50 scale)
- Geologic plan of the Lawrence level, Osceola Mine  
(50 scale)
- Geologic plans of the first, second, third, fourth,  
fifth, sixth and seventh levels, Pride of the West  
Mine (50 scale)

## INDEX OF FIGURES

	Page
Frontispiece	Photograph of surface buildings of the Pride of the West Mine . . . . . 1
Figure 1	Outline map of San Juan County showing the location of the Pride of the West Area . . . 6
2	Sketch map of Western and Central Colorado showing the dominant structural features . . . . 10
3	Photograph of Cunningham Gulch . . . . . 19
4	Photograph showing the relationship of a Curay limestone body to the surrounding volcanic rocks . . . . . 33
5	Photograph showing the detailed nature of a Curay limestone body . . . . . 34
6	Photograph of a hand specimen of Curay limestone breccia . . . . . 35
7	Photograph showing a hollow elliptical body of Curay limestone . . . . . 36
8	Photograph of a hand specimen of Curay limestone showing horn corals . . . . . 37
9	Photograph of Curay limestone showing well developed bedding . . . . . 38
10	Photomicrograph showing the assimilation of Curay limestone by an andesite flow . . . . . 40
11	Photograph showing the volcanic conglomerate member of the Middle Eureka Rhyolite . . . . . 47

ILLUSTRATIONS (Continued)

		Page
Figure 12	Photomicrograph showing the contact relations between a granite boulder and fragmental flow material . . . . .	49
13	Photograph showing the contact relations between the upper tuff member and the lower volcanic conglomerate of the Middle Eureka Rhyolite . . . . .	51
14	Photograph of a hand specimen of the flow breccia member, Upper Eureka Rhyolite . . . . .	54
15	Photograph of flow breccia member, Upper Eureka Rhyolite . . . . .	55
16	Photomicrograph of a typical spherulite in the rhyolite flow member of the Upper Eureka Rhyolite . . . . .	61
17	Photograph of Green Mountain showing the contact between the Eureka Rhyolite series and the Burns Latite series . . . . .	64
18	Geologic Map showing the structural features of the San Juan Mountains and related areas . . . . .	70
19	Geologic Map showing the structure of the Silverton volcanic center . . . . .	72
20	Geologic map showing the structure of the southeast portion of the Silverton volcanic center . . . . .	75
21	Photograph of one of the veins constituting the Pride of the West vein system . . . . .	86
22	Photograph showing the Schneider Open Pit . . . . .	87
23	Photograph of one of the veins constituting the Pride of the West vein system . . . . .	88
24	Photomicrograph showing a quartz veinlet cutting sphalerite . . . . .	91
25	Photomicrograph showing the transection of sphalerite and galena by a veinlet of quartz . . . . .	92
26	Photograph of a hand specimen of banded ore . . . . .	93

ILLUSTRATIONS (Continued)

		Page
Figure 27	Photomicrograph showing euhedral quartz in sphalerite . . . . .	94
28	Photomicrograph showing the lath shaped character of specular hematite . . . . .	96
29	Photomicrograph showing an antecedent veinlet of pyrite being replaced by galena . . . . .	97
30	Photomicrograph showing fracture filling of pyrite by quartz . . . . .	98
31	Photograph of a hand specimen of vein material containing sulphides . . . . .	100
32	Photomicrograph showing sphalerite being transected by a quartz veinlet . . . . .	101
33	Photomicrograph showing a portion of Figure 32 . . . . .	102
34	Photomicrograph showing a segmented veinlet of chalcopyrite and quartz transecting sphalerite . . . . .	103
35	Photomicrograph showing the peculiar spherical etch pattern developed on argentiferous galena when treated with concentrated HNO <sub>3</sub> . . . . .	104
36	Photomicrograph showing the typical atoll texture of pyrite surrounding galena . . . . .	106
37	Photomicrograph showing in detail one segment of the atoll texture . . . . .	107
38	Photomicrograph of atoll texture showing galena surrounded by a thick rim of pyrite . . . . .	108
39	Photomicrograph showing the filling and replacement of quartz by galena . . . . .	109
40	Photomicrograph showing the replacement of galena by carbonates . . . . .	110
41	Paragenesis chart of vein forming minerals in the Pride of the West vein systems . . . . .	112
42	Photomicrograph showing the replacement of galena by chalcopyrite . . . . .	114

ILLUSTRATIONS (Continued)

		Page
Figure 43	Photograph of a hand specimen showing a mineralized vein of milky quartz transecting the country rock . . . . .	115
44	Photograph showing the replacement of limestone by sulphides and quartz . . . . .	117
45	Photograph showing in detail part of the area of Figure 44 . . . . .	118
46	Photograph of a hand specimen containing high grade ore . . . . .	119
47	Photograph of a hand specimen showing a portion of a vein with banded sulphides and quartz . . . . .	120
48	Photograph of a hand specimen of a small vein showing the pronounced banding of the massive sulphides and quartz . . . . .	121
49	Photograph of a hand specimen of "Zebra Ore" showing the banded relationship between the sulphides and the quartz . . . . .	123
50	Photograph of a hand specimen of "Zebra Ore" showing the progressive increase in the size of the quartz bands . . . . .	124
51	Map of an E-W Section through the Pride of the West Mine at 9,400N . . . . .	132

The original material for this dissertation includes a significant number of oversized pages. The full text can be viewed by accessing the supplement file.
